

EXTERNAL ATTACK SURFACE 2019 TOP EXPOSURES

Reposify continuously scans the entire internet for exposed assets. In the hope for a safer 2020, here are some of the past year's highlights. You will not believe the things we found exposed!

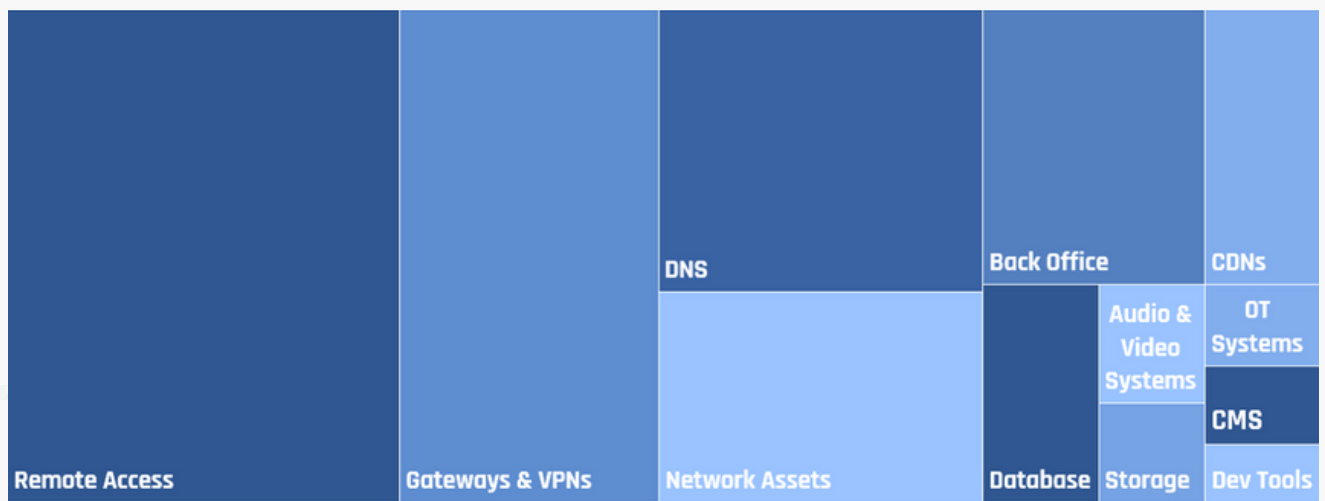

The numbers speak for themselves - in today's perimeter-less networks, implementing and enforcing IT& security policies is a constant struggle. Every month, millions of Shadow IT, misconfigured or unpatched assets are leaving organizations exposed to malicious attacks.

1 Billion+ YOUR ATTACK SURFACE IS BIGGER THAN YOU THINK

Assets were exposed to the internet on average every month in 2019.
